## Explore The E-Learning Institute

The concept of e-learning is not new to the education sector. However, the outbreak of COVID-19 has fuelled schools' need to leverage the technology platforms to drive learning initiatives. There is heightened demand for schools to provide learning solutions to students using online platforms as the advantages far outweigh the demerits. In simple terms, e-learning is the act of learning or educating via digital resources.

The use of digital platforms for learning is vividly changing our education system. Traditional classroom training days are slowly coming to an end due to high-speed internet and technology advancement. The pandemic has grown the importance of e-learning globally.
